**Seahorse Gallery**

- Go around to the exhibits and observe how the
  Seahorses blend into their surroundings. What do you notice in each exhibit that is different from the
  Seahorses themselves? ________________________
  ______________________________________________________________________

- What are two species of seahorses that are not like the ones you are familiar with?
  __________________
  ______________________________________________________________________

**Cove Forest**

- Listen to the sounds around you. What is it you hear? Can you spot an animal flying around?_______
  ______________________________________________________________________

- What helps the otter swim fast in the water? How else does it survive?
  ______________________________________________________________________

- Ask an aquarium staff to tell you two things about the otter you could not learn on the
  sign______________________________________________________________
  ______________________________________________________________________

**Discovery Hall**

- What do you hear when you enter the gallery? How many different sounds are there?
  ______________________________________________________________________

- Listen to all the sounds of the different frogs. Can you describe them by putting words to the calls to help you repeat them later?
  ______________________________________________________________________
-Go touch the sturgeon. Describe how they feel. What are at least three facts about them that the staff member mentioned? Think of one question you want to ask about the sturgeon.

**Delta**

-Imagine living in the wetlands. What do you see? What does the temperature around you feel like? What animal would you be?

-Why do you think wetlands are important for the ecosystem? Explain

**River Giants**

-Pick three giants. On what continent do they live?

-What can you do to protect these giants?

-Which one is the biggest one out of all of them in the exhibit?
**Stingrays/Sharks**

- Identify all of the sharks and stingrays in the exhibit.

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

- What are three facts the Aquarium staff member mentioned about either the stingray or the shark? Ask the staff member two questions.

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

- BONUS: find an animal in the exhibit that is not a fish.

____________________________________________________________________

**Butterflies**

- Find two butterfly species that you recognize from the identification card available in the foyer. If you can’t, then pick two butterflies you see in the exhibit and describe them.

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

- What are some items that these species can blend into?

____________________________________________________________________

- Feel the temperature around you. What does it feel like? Why do the
**Penguins**

- Find graphic number nine that is at the entrance of the exhibit. Where do most species of penguins live? The Fewest? ________________________________

- Go look for the sign to the right of the curved window that lists the penguins’ names. Is your penguin a Macaroni or a Gentoo? Now choose the color wing band your penguin is wearing. There is the penguins’ name! ________________________________

- Feel the temperature of the water they live in. How do they keep warm?

- What can you do to protect them? (hint: graphic 1)

**Secret Reef**

- Sit on the bench. Listen to your surroundings. What is it that you hear? ________________________________

- Who is the unique turtle that lives in the tank?
Describe what happened to him. (hint: explanation appears on a sigh at the Secret Reef window nearest Boneless Beauties) ________________________________

BONUS: Go to the underwater journey on the computer behind you.
Get a picture in the shark cage! AHH!

**Jellies**

- Go sit in the jelly moon room. Describe what you see and feel around you. ________________________________

- Go around the jellies exhibit and find your favorite species of jelly. Describe the one you picked. ________________________________
